

## **Come to our CPB Open Day on 21 January 2020**

**Conducting scientific research that has an impact on every Dutch person. If that appeals to you, CPB Netherlands Bureau for Economic Policy Analysis is the place to be. Come to our Open Day on 21 January, at The Hague, for information about a possible internship, job or work period during your PhD study.**

What are the economic effects of the Climate Agreement? What are the benefits of investment in education? How could the consequences of an ageing population be alleviated? Scientific researchers at CPB Netherlands Bureau for Economic Policy Analysis are facing these types of important issues.

At the Open Day, you will get to know the work done at CPB and will meet our economists and econometricians. Formulate a challenging case study and join CPB staff for a drink, afterwards.

### **Working at CPB can be characterised as follows:**

- Doing scientific research that is important to society. Your work matters.
- Getting straight to work in a team of active researchers. You will be part of the team, immediately, irrespective of whether you are an employee or an intern.
- Nice and enthusiastic colleagues to work with and to undertake social activities with.

### **Programme Open Day**

12:30–13:00 hrs: Doors open

13:00–13:05 hrs: Welcome by Jeroen Hinloopen, CPB Deputy Director

13:05–13:45 hrs: Presentation about working at CPB

13:45–14:30 hrs: Tour of the building by JongCPB

14:30–14:45 hrs: Short break

14:45–17:00 hrs: An interactive case study

17:00–18:30 hrs: Time for a drink!

### **Address**

Bezuidenhoutseweg 30, 2594 AV The Hague

### **Register**

Would you like to get to know CPB during the Open Day of 21 January? Nice! Register and send your CV to Jeannette Verbruggen, [J.L.Verbruggen@cpb.nl](mailto:J.L.Verbruggen@cpb.nl)

Are you unable to make it on 21 January, yet interested in what we have to offer? Please send an email to Jeannette Verbruggen, [J.L.Verbruggen@cpb.nl](mailto:J.L.Verbruggen@cpb.nl)

## **Come work at CPB**

CPB is looking for smart researchers with an interest in economic issues. Your profile: you are a student in economics, econometrics, mathematics or physics.

You can get started as:

- Intern
- PhD student
- Researcher employed at CPB

### **Internship**

As an intern, you will be part of the team, from day one. You will be joining a network of young, active researchers.

### **PhD student**

Are you working on your promotion? Write one of your papers while working at CPB. You will have access to a wealth of data, and be among experienced researchers with extensive knowledge of policy and literature.

### **Employed researcher**

Have you almost completed your master's degree or are about to get your PhD? At CPB, you will be responsible for setting up and carrying out high-quality research, or you will be working on CPB's projections for the global and national economy. These form the basis for the government's socio-economic policy decision-making process.

You will be addressing questions from government and the ministries, among others. You will be publishing and presenting the independent analyses for various target groups of policymakers and the world of science. In some cases, you will be able to combine your work at CPB with a PhD.

### **Recruitment**

In June 2020 and January 2021, CPB plans to organise a recruitment round for researchers. Keep an eye on the [website](#) or follow us on [LinkedIn](#).
